

the Nature top ten

The top ten charts the articles that have been downloaded most often, in **PDF** format, from the *Nature* website in the past calendar month. The chart does not rank the quality, scientific significance or citation impact of the content. However, it may bring articles to your attention that you might not have otherwise noticed. We hope you enjoy them.

JANUARY 2005

1. Role of the proto-oncogene *Pokemon* in cellular transformation and *ARF* repression

T. MAEDA *et al.*

433, 278 - 285

[Full Text](#) | [PDF](#)

2. Simultaneous determination of protein structure and dynamics

K. LINDORFF-LARSEN, *et al.*

433, 128 - 132

[Full Text](#) | [PDF](#)

3. Einstein is dead

E. MARRIS

433, 179

[Full Text](#) | [PDF](#)

4. Inadequate warning system left Asia at the mercy of tsunami

433, 3 - 5

[Full Text](#) | [PDF](#)

5. Nucleolar proteome dynamics

J.S. ANDERSEN *et al.*

433, 77 - 83

[Full Text](#) | [PDF](#)

6. Schrödinger's mousetrap

I. STEWART

433, 200 - 201

[Full Text](#) | [PDF](#)

7. Quantized conductance atomic switch

K. TERABE *et al.*

433, 47 - 50

[Full Text](#) | [PDF](#)

Get going in 2005

- Hot jobs
- Great employers
- Easy searching
- Wide choice
- Challenging projects
- Smart advice

There's no excuse not to.

naturejobs

8. β -Lactam antibiotics offer neuroprotection by increasing glutamate transporter expression

J.D. ROTHSTEIN *et al.*

433, 73 - 77

[Full Text](#) | [PDF](#)

9. A mechanism for impaired fear recognition after amygdala damage

R. ADOLPHS *et al.*

433, 68 - 72

[Full Text](#) | [PDF](#)

10. 2005: Year of Physics: So, what's your theory?

S. TOMLIN

433, 8
